Resolution for support of Highland Library Sign Variance

Be it Resolved, that the Highland District Council Board recommends support for a variance of the sign code requirement pertaining to the height requirement in order to install three new wall signs on the north elevation of the building as part of the Highland Library and Hillcrest Recreation Center renovation project. In the Highland Village Special Sign District the zoning code limits the highest point on a wall sign to 30 feet, they are proposing a sign that is 38 feet at the highest point for a variance of 8 feet.
