Resolution in Support of asking MnDot to keep open the Hwy 5 Bridge during Repair Work

Whereas MnDot was supposed to begin re-decking the Highway 5 bridge in 2014, with one side being completed in 2014 and the other to be completed in 2015,

Whereas, only one bid came in and the State has to rebid the process in the Fall of 2014, and reschedule the work. The State is now considering two options:

One is to complete one side in 2015 and one in 2016 or to close down the bridge entirely and complete the work in one year.

Whereas many members of the West 7th business community have expressed a concern about complete closure of the bridge,

Be it resolved that the Highland District Council supports completing the project in two phases so the Highway 5 bridge will remain open to traffic during construction.

Approved on May 7, 2014
By the Highland District Council Board of Directors

Resolution 2014-11E
