Resolution to Support Finding a Solution to the Congestion at the Randolph and Lexington Intersection

WHEREAS the residents and small businesses of Randolph Avenue have provided a great deal of input on the Randolph Ave reconstruction project, through public meetings and written communication,

WHEREAS many residents and businesses have expressed concerns about the traffic flow on Randolph because of the back up at the Lexington and 35E intersections,

WHEREAS the primary concern of local businesses is ensuring customers and suppliers have full access to their business, and customers are aware they have access,

WHEREAS the total reconstruction of a County road only happens once every 50 years or so,

BE IT RESOLVED that the Highland District Council asks Ramsey County to:

- Work closely with the City of Saint Paul, Metro Transit, immediate property owners and the Highland Park and Macalester Groveland neighborhoods to find a solution to solve the automobile congestion at this intersection,

Approved on September 4, 2014
By the Highland District Council Board of Directors

Resolution 2014-27E
